Note	From
<p>After analyzing the paper I found the topic suitable and interesting.</p> <p>In principle the paper is well structured, however, I think that the author might have used broader time series since 2020-2022 are very short series to have a sustainable conclusion on the issues.</p> <p>The second issue that might be improved is related to the literature used. Sometimes data used are older and don't reflect the developments so it is appreciated if the author could use more sources from new research in the field.</p> <p>In the research methodology, the design is not very clear and doesn't tell much about how are built the Hypothesis, and as a result, this is very difficult to conclude if those stated hypotheses are supported or not. It is very important that this issue is addressed in research.</p> <p>And finally, the conclusions are somehow very poor and arent followed with recommendations that the research could propose, so it will give more value to the research if the author takes those notes into consideration.</p> <p>Please Make your Revision Based on Our Comments.</p>	<p>ricounimal93 2023-03-19 04:27 AM</p>

Note	From
<p>Dear Author,</p> <p>Research Trentz, which is now the owner company of IJEBAS Journal, requires language and content editing of all the submissions before publishing the accepted articles. This service, which costs \$50, is definitely essential to complete the process of publication. This does not mean that IJEBAS Journal is a paid journal, which accepts all submissions for \$50. It is just opposite. Most submissions are rejected in the pre-editorial stage if they do not meet the academic quality criteria of Research Trentz.</p> <p>Please, let us know if you may wish to continue your submission process.</p> <p>Your prompt response is highly appreciated.</p> <p>Best regards.</p> <p>Editor in Chief</p>	<p>ricounimal93</p> <p>2023-03-19</p> <p>04:28 AM</p>
