Welcome

Dear Colleague

The Advances in Materials and Processing Technologies (AMPT) conference series was founded in 1993 at the Dublin City University, Dublin, Ireland. Since then the AMPT conferences were held in Ireland (1995, 1999 and 2003), Portugal (1997), Malaysia (1998), Spain (2001), Poland (2004), USA (2006), Korea (2007), Bahrain (2008), Malaysia (2009), Paris (2010), Turkey (2011), Australia (2012), Taiwan (2013) and Dubai (2014).

In 2015 the conference will be organized again in Madrid, Spain by IMDEA Materials Institute and Universidad Carlos III of Madrid. The conference sessions will cover a broad range of topics such as deformation processing, powder metallurgy, materials removal processes, processing of new and advanced materials, welding and joining, surface engineering and other related processes. The conference promises to be a highlight in the Materials & Processing Technologies calendar. The conference will be structured in topics, and the topics in symposiums including invited lecturers, keynote lecturers, oral presentations and a poster session. Relevant and international respected researchers will organize the symposiums and selected papers will be published after peer reviewing in Journals included in the Journal Citation Report.

Tuesday, July 19, 2016
We look forward to seeing you in Madrid.

Please note

The abstract deadline for AMPT 2015 is March 31st.

Motivasi :**1001 Alasan mengapa kita harus menulis karya ilmiah – INTERNATIONAL [SCOPUS]?**

1. Akan memaksa kita bekerja lebih keras (losing more hairs) dan memperoleh hasil penelitian yang baik.
2. Membantu kita merumuskan hasil penelitian yang sedang dikerjakan dan merencanakan langkah selanjutnya dari penelitian kita [HB, Publikasi, Paten, Rapid]
3. Peer-review terhadap artikel yang kita tulis dapat membantu memperbaiki arah penelitian anda (invaluable feedback and suggestions)
4. Ketika paper telah terpublikasi, kerja kita diakui baik secara nasional maupun international; Bagi Dosen, Publikasi paper sangat membantu dalam promosi karir/kenaikan pangkat dan jabatan (Penilai angka kredit menjadi lebih yakin akan hasil penelitian kita).

Inovasi untuk mencapai kejayaan dan kebenaran

5. Membantu kita memperbaiki ketrampilan komunikasi (Terutama jika ditulis dalam Bahasa Inggris) – *long term benefits*
 6. Menaikkan reputasi kita (memperbaiki track record), teman kerja kita (Tim peneliti), Institusi akan menaikkan karir kita (kenaikan pangkat dan jabatan lebih mulus)
 7. Publikasi (dalam Jurnal berbobot/terakreditasi/internasional) membuat kita memiliki *sense of achievement* –baik untuk kepercayaan diri kita, kehidupan sosial kita, “uang anda”?....)
 -
 -
1001. DIKTI memberikan incentif untuk publikasi internasional (UGM memberikan anugerah untuk publikasi internasional terbaik tiap tahun dengan hadiah sertifikat dan uang bantuan 10 juta rupiah).
- FT Unimal....Rp.2.000.000,- [2014]

Informasi tentang Laman Acuan Jurnal Ilmiah

Posted on 06 October 2013 by Administrator

Sebagai informasi, Kami sampaikan beberapa laman yang sering diacu oleh jurnal ilmiah:

1. ISI Knowledge -Thomson Reuter (USA)
2. SCOPUS (Netherland), <http://www.scimagojr.com>

Dalam usulan kenaikan jabatan/pangkat sering ditemui karya ilmiah yang diterbitkan di jurnal tidak terakreditasi (terbitan PT sendiri) dan penulis adalah salah satu dari editor jurnal. Dosen disarankan untuk menulis karya ilmiah di jurnal yang bidang keilmuannya sebidang dan tidak diterbitkan hanya dalam jurnal yang diterbitkan di jurnal PT sendiri.

A. Beberapa jurnal dengan kondisi overlap yang sudah ditemukan oleh Tim PAK.

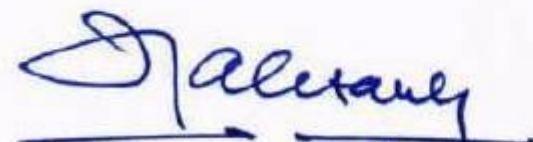

1. Publisher: International Digital Organization for Scientific Information (idosi) www.idosi.org/journals.htm , nama jurnal : Academic Journal of cancer Research. Kejanggalan yang sudah diketahui :
 1. Seorang author namanya tercantum dalam seluruh artikel dalam satu nomor terbitan,
 2. Volume dan nomor terbitan tidak beraturan, dalam satu tahun dapat terbit lebih dari satu volume
 3. Pada satu issue dimuat artikel2 yang author nya dari wilayah tertentu.
2. World Scienctific and Engineering Academic Society (WSEAS) www.wseas.org. Salah satu Associate Editor di jurnal WSEAS *Transactions on Circuits and Systems* pernah ditemui oleh salah seorang anggota Tim PAK ditahun 1999 di Perth sudah berumur hampir 80 tahun, dan artinya sekarang sudah mendekati 100 tahun usianya , apakah mungkin?
3. Publisher World Academy of Science Engineering and Technology (WASET) www.waset.org juga perlu dicermati dan diberikan pendapat tentang jurnal.
4. Publisher Academic Journals salah satunya African Journal of Bio Technology , terindeks scopus mempunyai SJR. Menurut Jeffrey Beall jurnal ini dikelola oleh satu orang . Kalau dilihat foto Editornya adalah orang orang yang sudah sangat sepuh usianya mungkin sama dengan yang di Publisher WSEAS.

Jurnal internasional bereputasi adalah jurnal yang memenuhi kriteria jurnal internasional sebagaimana butir 8 huruf a sampai f, dengan kriteria tambahan terindek pada *Web of Science* dan/atau *Scopus* serta mempunyai faktor dampak (*impact factor*) dari *ISI Web of Science (Thomson Reuters)* atau *Scimago Journal Rank (SJR)* mempunyai urutan tertinggi dalam penilaian karya ilmiah dan dinilai paling tinggi 40.

Jurnal yang memenuhi kriteria jurnal internasional pada butir 8 dan terindek oleh database internasional (*Web of Science*, *Scopus*, atau *Microsoft Academic Search*) namun belum mempunyai faktor dampak (*impact factor*) dari *ISI Web of Science (Thomson Reuters)* atau *Scimago Journal Rank (SJR)* dalam penilaian karya ilmiah dan dinilai paling tinggi 30.

Jurnal yang memenuhi kriteria jurnal internasional pada butir 8 yang belum terindek pada database internasional bereputasi (*Web of Science*, *Scopus*, atau *Microsoft Academic Search*) namun telah terindek pada database internasional seperti DOAJ, CABI, Copernicus, dan/atau laman sesuai dengan pertimbangan Ditjen Dikti dan dapat dinilai karya ilmiah paling tinggi 20.

Apakah SCOPUS itu?

Scopus merupakan database abstrak dan citation dari peer-reviewed artikel jurnal, dan literatur dari berbagai sumber web penting lainnya.

Scopus merupakan database yang terbesar di dunia saat ini karena sumbernya dari berbagai publisher di seluruh dunia (tidak hanya Elsevier saja) dan mencakup juga jurnal-jurnal non English (abstrak dalam bahasa Inggris).

Bagaimana SCOPUS bekerja?

- Secara garis besar cara kerja Scopus sama seperti database online berbayar lainnya, misalnya ScienceDirect, Springer, Proquest. Jadi didalamnya kita tinggal menuliskan ‘keyword’ yang kita inginkan dalam ‘search engine’ Scopus dan hasil pencarian tersebut akan ditampilkan.

As researchers and scholars, you face the ongoing challenge of distinguishing your research activities from those of others with similar names. You need to be able to easily and uniquely attach your identity to research objects such as datasets, equipment, articles, media stories, citations, experiments, patents, and notebooks. As you collaborate across disciplines, institutions and borders, you must interact with an increasing number and diversity of research information systems. Entering data over and over again can be time-consuming, and often frustrating.

ORCID is an open, non-profit, community-driven effort to create and maintain a registry of unique researcher identifiers and a transparent method of linking research activities and outputs to these identifiers. ORCID is unique in its ability to reach across disciplines, research sectors and national boundaries. It is a hub that connects researchers and research through the embedding of ORCID identifiers in key workflows, such as research profile maintenance, manuscript submissions, grant applications, and patent applications.

ORCID provides two core functions: (1) a registry to obtain a unique identifier and manage a record of activities; and (2) APIs that support system-to-system communication and authentication. ORCID makes its code available under an open source license, and will post an annual public data file under a CC0 waiver for free download.

The ORCID Registry is available free of charge to individuals, who may obtain an ORCID identifier, manage their record of activities, and search for others in the Registry. Organizations may become members to link their records to ORCID identifiers, to update ORCID records, to receive updates from ORCID, and to register their employees and students for ORCID identifiers.

ORCID records hold non-sensitive information such as name, email, organization and research activities. ORCID understands the fundamental need for individuals to control how their data are shared, and provides tools to manage data privacy. We take steps to protect your information, consistent with the principles set forth in our Privacy Policy, which are intended to comply with the Safe Harbor Principles issued by the U.S. Department of Commerce.

Authors are invited to submit a case study article to JCBM's open access sister journal, Case Studies in Construction Materials. If your work is based on a construction project then a short case study paper is an attractive supplement to the paper you aim to publish in Construction and Building Materials.

There is a small fee to publish in Case Studies in Construction Materials but your work will be available and promoted to a practitioner community giving you the chance to showcase the application of the work you've been doing to a more general audience. To find out more about Case Studies in Construction Materials and to submit a paper, please visit the webpage: [Case Studies in Construction Materials](#)

We do offer fee waivers for some papers, so if you are unable to cover the cost of publication, please do contact the Publisher at: j.dangelo@elsevier.com
